# The Alphabet

---

The slides used in class to help you spell all the letters of the alphabet as if you were a true English person !

At [Dropbox](#) (you need Powerpoint to open it)

The same but on [Keynote](#) (you need to have an iCloud account)

In case you fail to open the slides on your computer, you can try to open it with the Open office suit but I'm afraid you won't get to hear the audios - sorry, guys !

You can also listen to this song and do the activities related to it. [Jack's I-spy on the British Council website](#) will help you improve your English sounds and spelling.
